

Power Bank Xtreme 9000

AL420

With an Xtorm Power Bank you can easily charge your mobile device anytime you like. With it you can charge devices like your smartphone, tablet, MP3-player or others while you're on the go.

The Power Bank Xtreme 9000 is a mobile charger with a battery capacity of 9000mAh. It has sufficient energy to provide to charge a tablet or to fully recharge a smartphone up to 4½ times.

The power bank comes in a silicone housing that is water- and dust-proof to IP66 classification. This makes it excellent to use in harsh, outdoor environments, where endurance and sturdiness is key.

With an input of 2A and output of 2.1A, this Power Bank rapidly charges any mobile device and is recharged in under 5 hours.

With a simple touch of the button, the LED indicators will tell you the battery status, so you can see how much power is stored in the wink of an eye. Another touch easily starts or stops the charging of your device. The Power Bank itself can be recharged via either USB or AC power¹.

The Xtorm Xtreme 9000 is ideal on holidays, in the big outdoors, at extreme sports or for daily use. With this manageable mobile charger you're always equipped with a back-up battery whenever and wherever you need it.

In short:

- **9000mAh**
- **Waterproof casing (IP66)**
