USER GUIDE

Smart WiFi RGB+W Light Shelly®

The Shelly® Smart WiFi RGB+W Light by Allterco Robotics is intended to be installed into a standard light socket (E27) in order to control the color and to dim the light. Shelly may work as a standalone device or as an accessory to She® or another home automation controller.

Specification

Power supply:
110-230V $\pm 10\%$
50/60Hz AC

Socket:
E27

Power Rating:

- RGB: 6W
- Warm White: 9W

Brightness:

- Red: 220-244 LM
- Green: 200-220 LM
- Blue: 200-220 LM
- Warm White: 750-800 LM

Color Temperature:

3000K-6500K

Beam Angle:
270°

Working temperature:

From -25°C to 55°C

Complies with EU standards:

- RE Directive 2014/53/EU
- LVD 2014/35/EU
- EMC 2004/108/WE
- RoHS2 2011/65/UE

Radio signal power:
1mW

Radio protocol:

WiFi 802.11 b/g/n

Frequency:

2400 – 2500 MHz;

Operational range (depending on local construction):

- up to 15 m outdoors
- up to 8 m indoors

Dimensions:

117 x 67 x 42 mm

Electrical consumption:

< 1 W

SAR:

1.10 W/Kg

Technical Information

- Control through WiFi from a mobile phone, tablet, PC, automation system or any other device supporting HTTP and/or UDP protocol.
- Microprocessor management.
- Controlled elements: multiple white and colour (RGB) LED diodes.
- Shelly may be controlled by an external switch.

CAUTION! Danger of electrocution. Plugging the device to the has to be performed with caution.

CAUTION! Do not allow children to play with the device. Keep the devices for remote control of Shelly (mobile phones, tablets, PCs) children.

CAUTION! Please handle with care! The [®] Smart Light is Shelly **FRAGILE**

Introduction to Shelly[®]

Shelly[®] is a family of innovative devices, which allow remote control of electric appliances through mobile phone, PC or home automation system. Shelly[®] uses WiFi to connect to the devices controlling it. They can be in the same WiFi network or they can use remote access (through the internet). Shelly[®] may work standalone, without being managed by a home automation controller, in the local WiFi network, as well as through a cloud service, from everywhere the User has Internet access.

Shelly[®] has an integrated web server, through which the User may adjust, control and monitor the Device. Shelly[®] has two WiFi modes - Access Point (AP) and Client Mode (CM). To operate in Client Mode, a WiFi router must be located within the range of the device. Shelly[®] devices can communicate directly with other WiFi devices through HTTP protocol.

An API can be provided by the Manufacturer. Shelly[®] devices may be available for monitor and control even if the User is outside the range of the local WiFi network, as long as the WiFi router is connected to the Internet. The Shelly Cloud function could be used, which is activated through the web server of the Device or through the settings in the Shelly Cloud mobile application.

The User can register and access the Shelly Cloud, using either Android or iOS mobile applications, or any internet browser and the web site:

<https://my.shelly.cloud/>.

Installation Instructions

CAUTION! Danger of electrocution. Before installing the Device into the light socket please check if it has been powered off.

CAUTION! Before beginning the installation please read the accompanying documentation carefully and completely. Failure to follow procedures could lead to malfunction, danger to your life or violation of safety regulations. Allterco Robotics is not responsible for any loss or damage in case of incorrect installation or operation of this device.

CAUTION! Use the Device only with power grid which comply with all applicable regulations. Short circuit in the power grid may damage the Device.

RECOMMENDATION: The Device may be connected to and may control electric circuits and light sockets only if they comply with standards and safety norms.

Initial Inclusion

Install the Shelly to the light socket. Press the switch/button to which Shelly is connected. The Shelly should turn on. Press the switch/button again and Shelly will turn off.

You may choose if you want to use Shelly with the Shelly Cloud mobile application and Shelly Cloud service. You can also familiarize yourself with the instructions for Management and Control through the embedded Web interface.

Factory Reset

You can return your Shelly Bulb to its Factory Settings by pressing 5 consecutive times the button/switch for control.

Upon successful factory reset Shelly will turn Blue.

Control your home with your voice

All Shelly devices are compatible with Amazon Echo and Google Home. Please see our step-by-step guide on:

<https://shelly.cloud/compatibility/Alexa>

<https://shelly.cloud/compatibility/Assistant>

MOBILE
APPLICATION
FOR SHELLY®

Allterco Robotics
EOOD Sofia, Bulgaria®
March, 2017

The Shelly Cloud mobile application

Shelly Cloud gives you the opportunity to control and adjust all Shelly® devices from anywhere in the world.

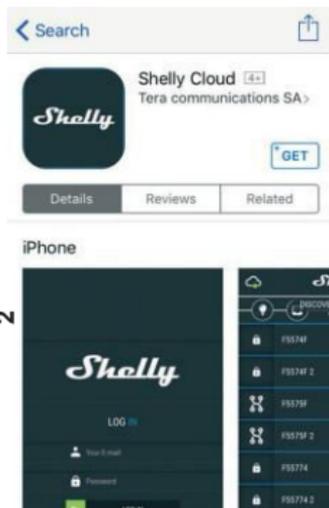

All you need is an Internet connection and our mobile application, installed on your smartphone or tablet.

To install the application please visit Google Play (Android - fig. 1) or App Store (iOS - fig. 2) and install

fig. 1

fig. 2

Registration

The first time you load the Shelly Cloud mobile app, you have to create an account which can manage all your Shelly® devices.

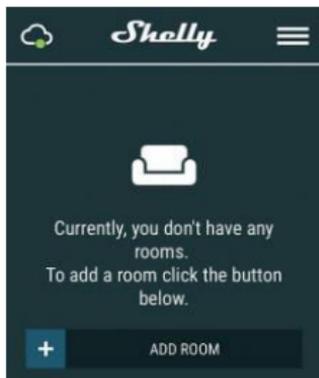

Forgotten Password

In case you forget or lose your password, just enter the e-mail address you have used in your registration. You will then receive instructions to change your password.

WARNING! Be careful when you type your e-mail address during the registration, as it will be used in case you forget your password.

After registering, create your first room (or rooms), where you are going to add and use your Shelly devices.

Shelly Cloud gives you opportunity to create scenes for automatic turning on or off of the Devices at predefined hours or based on other parameters like temperature, humidity, light etc.

Shelly Cloud allows easy control and monitoring using a mobile phone, tablet or PC.

Device Inclusion

To add a new Shelly device, plug it to the power grid following the Installation Instructions included with the device.

Step 1

Install your Shelly into the light socket and turn the light on.

WARNING: At the initial inclusion the light of the bulb must be Blue. If the light is not blue or you want to add the Device to another Wi-Fi network, turn ON/OFF your bulb 5 times to reset it into an Access Point Mode. If not, please repeat or contact our customer support at: support@shelly.cloud

Step 2

Choose “Add Device”.

In order to add more devices later, use the app Menu at the top right corner of the main screen and click “Add Device”.

Type the name (SSID) and password for the WiFi network, to which you want to add the Device.

Step 3

If using iOS: you will see the following screen:

Press the Home button of your iPhone/ iPad/iPod. Open Settings > WiFi and connect to the WiFi network created by Shelly, e.g. **shellycolor-35FA58**.

If using Android: your phone/tablet will automatically scan and include all new Shelly devices in the WiFi network that you are connected to.

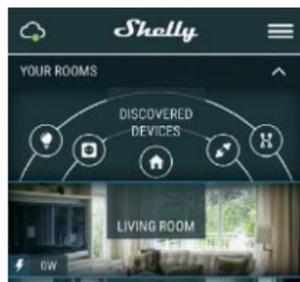

Upon successful Device Inclusion to the WiFi network you will see the following pop-up:

Step 4:

Approximately 30 seconds after discovery of any new devices on the local WiFi network, a list will be displayed by default in the "Discovered Devices" room.

Step 5:

Enter the Discovered Devices and choose the Device you want to include in your account.

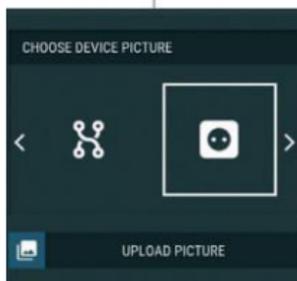

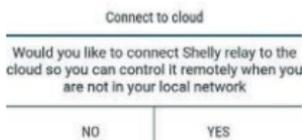

Step 6:

Enter a name for the Device (in the Device Name field). Choose a Room, in which the device has to be positioned. You can choose an icon or add a picture to make it easier to recognize. Press "Save Device".

Step 7:

To enable connection to the Shelly Cloud service for remote control and monitoring of the Device, press "yes" on the following pop-up.

Shelly Devices Settings

After your Shelly device is included in the app, you can control it, change its settings and automate the way it works.

To switch the device on and off, use the respective ON/OFF button.

To enter at the details menu of the respective device, simply click on its name. From the details menu you may control the device, as well as edit its appearance and settings.

EDIT DEVICE - allows you to change the device's name, room and picture.

LIGHT MODES - Shelly Bulb has two light modes: Color (fig. 3) and White (fig. 4):

Color - In Color mode you have a full color gamma to choose the desired color from. Under the color gamma you have 4 pure predefined colors – Red, Green, Blue & Yellow. Below the predefined colors you have the dimmer slider from which you can vary the Shelly Bulb's brightness.

White - In White mode you have a white gamma from which you can slide through and select the desired temperature of

white. Under the white gamma you have

3 predefined temperatures - Warm, White & Cold. Below the predefined states you have the dimmer slider from which you can vary the Shelly Bulb's brightness.

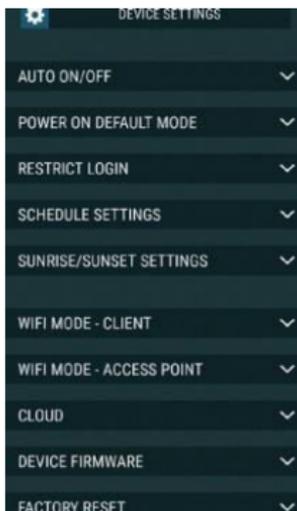

fig. 3

fig. 4

DEVICE Settings - allows you to change settings. For example, with Restrict Login you may enter a username and password to restrict access to the embedded web interface in the Shelly device. You may automate the device operations from this menu as well.

Power On Default Mode

This setting controls whether the device will supply power or not the output as a default whenever it is receiving power from the grid:

ON: When the device is powered, by default the socket will be powered.

OFF: Even if the device is powered, by default the socket will not be powered. **Restore Last**

Mode: When power is restored, by default, the appliance will return to the last state it was in before shutdown.

Auto ON/OFF

To manage the power supply automatically, you may use:

When ON – Auto OFF after: After turning on, the power supply will automatically shutdown after a predefined time (in seconds). A value of 0 will cancel the automatic shutdown.

When OFF – Auto On after: After turning off, the power supply will be automatically turned on after a predefined time (in seconds). A value of 0 will cancel the automatic power-on.

Sunrise/Sunset Hours requires an Internet connection. To use Internet, a Shelly device has to be connected to a local WiFi network with a working Internet connection.

Shelly receives actual information through the Internet about the time of sunrise and sunset in your area. Shelly may turn on or off automatically at sunrise/sunset, or at a specified time before or after sunrise/sunset.

On/Off hours

This function requires an Internet connection. To use Internet, a Shelly device has to be connected to a local WiFi network with a working Internet connection.

Shelly may turn on/off at a predefined time.

Some of the features of the Shelly Cloud mobile application are available at <https://my.shelly.cloud/> as well.

Shelly[®] PLUG

WiFi Smart Plug

is compatible with *Shelly*[®] BULB

www.Shelly.cloud
by Allterco Robotics

The Embedded Web Interface

Even without the mobile app the Shelly device can be set and controlled through a browser and WiFi connection of a mobile phone, tablet or PC.

ABBREVIATIONS USED:

Shelly-ID – the unique name of the device. It consists of 6 or more characters. It may include numbers and letters, for example **35FA58**.

SSID – the name of the WiFi network, created by the device, for example **shellycolor-35FA58**.

Access Point (AP) – the mode in which the device creates its own WiFi connection point with the respective name (SSID).

Client Mode (CM) – the mode in which the device is connected to another WiFi network.

Installation/Initial

inclusion Step 1

Install **WARNING:** At the initial inclusion the light of the bulb must be Blue. If the light is not blue or you want to add the Device to another Wi-Fi network, turn ON/OFF your bulb 5 times to reset it into an Access Point (AP) Mode. If not,

Step 2 please repeat or contact our customer support at: support@shelly.cloud
When the light turns on, Shelly has created an own WiFi network (own AP), with name (SSID) such as **shellycolor-35FA58**. Connect to it with your phone, tablet or PC.

Step 3

Type **192.168.33.1** into the address field of your browser to load the web interface of the Shelly device.

General - Home Page

This is the home page of the embedded web interface. If it has been set up is correctly, you will see information about:

- Current electrical consumption
- Settings menu button
- Current state (on/off)
- Present time

Settings – General Settings

In this menu, you can configure the Shelly device's work and connection modes.

WiFi Settings – the WiFi connection settings.

Access Point (AP) Mode: Allows the device to operate as a WiFi access point. The User can change the name (SSID) and the password to access the WiFi. After you have entered the desired settings, press Connect.

WiFi Client Mode (CM): Allows the device to connect to an available WiFi network. In order to switch to this mode, the User must enter the name (SSID) and the password to connect to a local WiFi network. After entering the correct details, press Connect.

ATTENTION! If you have entered incorrect information (wrong settings, usernames, passwords etc.) you will not be able to connect to Shelly.

WARNING: At the initial inclusion the light of the bulb must be Blue. If the light is not blue or you want to add the Device to another Wi-Fi network, turn ON/OFF your bulb 5 times to reset it into an Access Point (AP) Mode. If not,

Login: Access to the Device

please repeat or contact our customer support at: login@shelly.com

Set Login by you can turn authentication on or off

Username - A username set by you

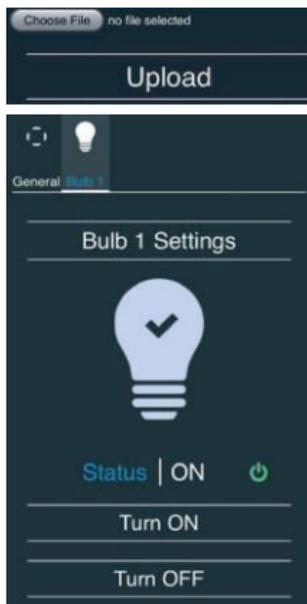

Password - A password set by you

Username and Password

This is where you can change your username and password. You must enter a new username and the new password, then press Save to save the changes.

Connect to Cloud: You can turn the connection between Shelly and Shelly Cloud on or off.

Factory reset: Return Shelly to its factory settings.

Firmware Upgrade: Shows present firmware version. If a newer version is available, officially announced and published by the Manufacturer, you can update your Shelly device. Click Choose File you to choose the previously downloaded firmware update file. Then click the Upload File to install it to your Shelly device.

Device Reboot: Reboots the device.

Managing the Shelly Device Bulb Screen

In this screen you can control, monitor and change the settings for turning the light on and off.

You can also see the current status (on/off) of Shelly, Buttons Settings, ON and OFF.

To control Shelly press Bulb 1:
To turn Shelly on press “Turn ON”.
To turn Shelly off press “Turn OFF”

Press the icon ➤ to go to the previous menu.

Shelly Power Management Settings

Each Shelly device can be configured individually. This lets you personalize each Shelly device in a unique manner, or consistently, as you choose.

Power On Default State

This setting controls whether the device will supply power or not the output as a default whenever it is receiving power from the grid:

ON: When the device is powered, by default the socket will be powered.

OFF: Even if the device is powered, by default the socket will not be powered.

Restore Last State: When power is restored, by default, the appliance will return to the last state it was in before the last power off/shutdown.

Auto ON/OFF

Automatic powering/shutdown of the bulb:

Auto OFF after: After turning on, the power supply will be automatically shut down after a predefined time (in seconds). A value of 0 will cancel the automatic shutdown.

Auto ON after: After turning off, the power supply will be automatically turned on after a predefined time (in seconds). A value of 0 will cancel the automatic start.

Sunrise/Sunset hours

This function requires an Internet connection. To use Internet, a Shelly device has to be connected to a local WiFi network with a working Internet connection.

Shelly receives actual information through the Internet about the time of sunrise and sunset in your area. Shelly may turn on or off automatically at sunrise/sunset, or at a specified time before or after sunrise/sunset.

On/Off hours

This function requires an Internet connection. To use Internet, a Shelly device has to be connected to a local WiFi network with a working Internet connection.

Shelly may turn on/off automatically at a predefined time.

Additional Features

Shelly allows control via HTTP from any other device, home automation controller, mobile app or server.

For more information about the REST control protocol, please visit:

www.shelly.cloud or send a request to developers@shelly.cloud.

Warranty Terms

1. The Device's warranty term is 24 (twenty four) months, beginning since the date of purchase by the End User. The Manufacturer does is not responsible for extra warranty terms by the End Seller.

2. The Warranty is valid for the territory of EU.

The warranty is applicable in compliance with all relevant laws and users' rights protections. The purchaser of the Device is entitled to exercise his/her rights in accordance with all applicable laws and regulations.

3. Warranty terms are provided by Allterco Robotics EOOD (referred hereinafter as the Manufacturer), incorporated under the Bulgarian law, with address of registration 109 Bulgaria Blvd, floor 8, Triaditsa Region, Sofia 1404, Bulgaria, registered with the Commercial Register kept by the Bulgarian Ministry of Justice's Registry Agency under Unified Identity Code (UIC) 202320104.

4. Claims regarding the Conformity of the Device with the terms of the contract of sale shall be addressed to the Seller, in accordance with its terms of sale.

5. Damages such as death or body injury, deterioration or damages to objects different from the defective product, caused by a defective product, are to be claimed against the Manufacturer using the contact data of the Manufacturer's company.

6. The User may contact the Manufacturer via e-mail at support@shelly.cloud for operational problems that may be resolved remotely. It is recommended that the User contact the Manufacturer before sending the device for servicing.

7. The terms of removing defects depends on the commercial terms of the Seller. The Manufacturer is not responsible for untimely servicing of the Device or for faulty repairs carried out by unauthorized service.

8. When exercising their rights under this warranty, the User must provide the device with the following documents: receipt and valid warranty card with date of purchase.

9. After a warranty repair has been carried out, the warranty period is extended only for that period.

10. The warranty does NOT cover¹⁷ any damages to the device which occur in the

following circumstances:

- When the Device has been used or wired inappropriately, including inappropriate fuses, overpassing maximal values of load and current, electric shock, short circuit or other problems in the power supply, the power grid or the radio network.
- When there is a non-compliance between warranty card and/or without a purchase receipt, or attempted forgery of these documents, including (but not limited to) the warranty card or the documents proving the purchase.
- When there has been a self-repair attempt, (de)installation, modification, or adaptation of the Device by unauthorized persons.
- Intentional or negligent improper handling, storing or transportation of the device, or in the event of non-observance of the instructions included in this warranty.
- When a non-standard power supply, network, or faulty devices have been used.
- When damages occur which were caused regardless of the Manufacturer, including but not limited to: floods, storms, fire, lightning, natural disasters, earthquakes, war, civil wars, other force majeure, unforeseen accidents, robbery, water damage, any damages made by ingress of liquids, weather conditions, solar heating, any damages made by intrusion of sand, humidity, high or low temperature, or air pollution.
- When there are other reasons beyond manufacturing defect, including but not limited to: water damage, ingress of liquid into the device, weather conditions, solar overheating, intrusion of sand, humidity, low or high temperature, air pollution.[u1]
- When there have been mechanical damages (forced opening, breaking, cracks, scratches or deformations) caused by a hit, fall, or from another object, wrong use, or caused by not following the instructions for use.
- When damage has been caused by exposing the device to severe outdoor conditions such as: high humidity, dust, too low or too high temperature. Terms of proper storage are specified in the User Manual.
- When damage has been caused by lack of maintenance by the User, as specified in the User Manual.
- When damage has been caused by faulty accessories, or those not recommended by the Manufacturer.
- When damage has been caused by the use of non-original spare parts or accessories not suitable for the specified Device model, or after

- When damage has been caused by the use of faulty devices and/or accessories.
- When damage has been caused by faulty software, a computer virus or other harmful behaviour on the Internet, or by lack of software updates or incorrect updates by a method not provided by either the Manufacturer or by the Manufacturer's software.

11. The range of warranty repairs does not include periodical maintenance and inspections, particularly cleaning, adjustments, checks, bug fixes or program parameters and other activities that must be performed by the User (Buyer). The warranty does not cover wear of the Device, because such elements have a limited lifespan.

12. The Manufacturer is not responsible for any property damage caused by a defect in the Device. The Manufacturer is not liable for indirect damages (including but not limited to loss of profits, savings, lost profits, claims by third parties) in connection with any defect of the Device, nor for any property damage or personal injury arising out of or related to the use of the Device.

13. The Manufacturer is not responsible for damage caused by circumstances independent of the Manufacturer, including but not limited to: floods, storms, fire, lightning, natural disasters, earthquakes, war, civil unrest and other force majeure, unforeseen accidents, or theft.

Environmental Protection

This marking on the device, accessories, or documentation indicates that the device and its electronic accessories (charger, USB cable) must be disposed only in specially designated locations.

This marking on the battery, the instruction manual, the safety instructions, the warranty card or the packaging indicates that the battery in the device must be disposed only in specially designated locations.

Please follow the instructions for environmental protection and proper disposal of the Device, its accessories, and its packaging for the recycling of the materials for their further usage and to keep the environment clean!
